Architect: Ashwin Ananth,
Ashwin Architects, Bengaluru

Luxury toilets now have every possible feature to make it a convenient and pleasurable place to be. Trailing in the same path... this one not only has the latest fixtures such as low water usage closets/shower-heads/faucets, but also the convenience of anti-skid flooring. The wall designs are a combination of granite, vitrified tiles & marble to give interesting wall patterns with a 3D effect. Small ledges in sync with the design add to the convenience to place small items & decorative pieces. Carefully selected light fixtures further improve the ambience.
